

### Library Director

Eager to support a school district initiative focused on boosting elementary school math performance.

### Assistant Library Director

Concerned STEM is a trendy topic rather than the core mission of library youth services.

### Children's Librarian

Excited to integrate reading and STEM and serve Head Start centers.

### Teen Librarian

Disappointed operating funds weren't allocated to making-related teen programming in the same three focal communities.

## Volunteers

Love the library and are eager to give back. Some don't like math.
